

What is claimed is:

1. A printing device comprising:

a printing job receiving unit for receiving a printing job;

5 a command analyzing unit for analyzing a command included in said printing job;

a default setup modifying unit for modifying a default setup based on a default setup modifying command when said command is said default setup modifying command; and

10 a printing unit for printing data to be printed included in said printing job.

2. A printing device claimed in claim 1, wherein

said printing unit prints said data in accordance with the default setup modified by said default setup modifying unit.

15

3. A printing device claimed in claim 1, wherein

said printing unit prints the contents of the default setup modified by said default setup modifying unit.

4. A printing job transmission device comprising:

20 a default setup inputting unit for inputting a default setup for a printing device;

a printing job preparation unit for preparing a printing job including a default setup modifying command for modifying the default setup of said printing device to a default setup

entered by said default setup input unit; and

a printing job transmission unit for transmitting said printing job to said printing device.

5 5. A printing system comprising a printing device and a printing job transmission device, which are connected to be able to communicate with each other; wherein,

said printing job transmission device comprising:

a default setup inputting unit for inputting a default setup for said printing device;

10 a printing job preparation unit for preparing a printing job including a default setup modifying command for modifying the default setup of said printing device to a default setup entered by said default setup input unit; and

15 a printing job transmission unit for transmitting said printing job to said printing device; and

said printing device comprising:

a printing job receiving unit for receiving a printing job;

20 a command analyzing unit for analyzing a command included in said printing job;

a default setup modifying unit for modifying a default setup based on a default setup modifying command when said command is said default setup modifying command; and

a printing unit for printing data to be printed included

in said printing job.

6. A printing system claimed in claim 5, wherein
said printing unit of said printing device prints said
data in accordance with the default setup modified by said
5 default setup modifying unit.

7. A printing system claimed in claim 5, wherein
said printing unit of said printing device prints the
contents of the default setup modified by said default setup
modifying unit.

10 8. A printing method comprising:
a printing job receiving step of receiving a printing
job;

a command analyzing step of analyzing a command included
in said printing job;

15 a default setup modifying step of modifying a default
setup based on a default setup modifying command when said
command is said default setup modifying command; and

a printing step of printing data to be printed included
in said printing job.

20 9. A printing method claimed in claim 8, wherein
said printing step prints said data in accordance with
the default setup modified by said default setup modifying
step.

10. A printing method claimed in claim 8, wherein

said printing step prints the contents of the default setup modified by said default setup modifying step.

11. A printing job transmission method comprising:

5 a default setup inputting step of inputting a default setup for a printing device;

a printing job preparation step of preparing a printing job including a default setup modifying command for modifying the default setup of said printing device to a default setup entered by said default setup input step; and

10 a printing job transmission step of transmitting said printing job to said printing device.

12. A printing program for causing a printing device to execute:

15 a printing job receiving step of receiving a printing job;

a command analyzing step of analyzing a command included in said printing job;

20 a default setup modifying step of modifying a default setup based on a default setup modifying command when said command is said default setup modifying command; and

a printing step of printing data to be printed included in said printing job.

13. A printing program claimed in claim 12, wherein said printing step prints said data in accordance with

the default setup modified by said default setup modifying step.

14. A printing program claimed in claim 12, wherein
said printing step prints the contents of the default
5 setup modified by said default setup modifying step.

15. A computer-readable medium storing the printing program claimed in claim 12.

16. A printing job transmission program for causing a printing job transmission device to execute:

10 a default setup inputting step of inputting a default setup for a printing device;

a printing job preparation step of preparing a printing job including a default setup modifying command for modifying the default setup of said printing device to a default setup
15 entered by said default setup input step; and

a printing job transmission step of transmitting said printing job to said printing device.

17. A computer-readable medium storing the printing job transmission program claimed in claim 16.
